INSTRUCTIONS FOR USE OF RECORDS
SURVEY WORK SHEET (Form No. 138)

In order to prepare comprehensive Records Control Schedules and to properly analyze and evaluate the results obtained it is essential that a Work Sheet be prepared for each records series as outlined below:

- a. Date Enter the current date of the survey.
- b. Office, Division, Branch, and Section. Enter the organizational elements down to the unit maintaining the files.
- c. Location. Enter building name or number and room number.
- d. Name of File. The title selected for the file series should be descriptive, self-explanatory, and consistent with the terminology of the office using and maintaining the file.
- e. Custodian. Enter name of the custodian or the person who is responsible for the files.
- f. Description. This is the most important factor involved in conducting a records disposition survey. The Area Records Officer should obtain answers to questions such as these: What is the purpose or use of the record? Where does it originate and to what office is it distributed? What is its relationship to other records? What is the frequency of use? Such questions are obviously necessary for a competent appraisal of the records. The importance of accuracy and completeness in this detail cannot be over emphasized if proper values are to be assigned to records.
- g. Filing Arrangement. Record the filing arrangement of the record series. This should be recorded in brief statements such as: "Alphabetically by Surname," "Alphabetically by Subject," "Numerically by Requisition Number," etc.
- h. Inclusive Dates. Enter the date (year only) of the oldest document in the series and the date (year only) of the most recent documents.
- i. Size of Records. Check in appropriate squares the size of the Records and enter the linear feet of records in the box provided. Linear feet of records recorded on Survey Sheets should be the actual measurement regardless of the size of the record. Later, when preparing the Records Control Schedule this footage will be converted to cubic feet in accordance with the attached table of standard measurements (See exhibit No. J)
- j. Equipment Occupied by Records. Check in the appropriate square the type of filing equipment housing the records and enter the number of frames, trays, shelves, etc. utilized.

k. Remarks. This space is useful for recording ideas, conversations, comments, or other information pertaining to the record series not included elsewhere on the work sheet. Such bits of information often aid materially in the evaluation process or in solving a record problem.
